

Cybercrime Intelligence Investigation Report

Case ID: CASE002

Primary Threat Scenario: Independent Complaints

Confidence Level: Moderate

Executive Summary

Case CASE002 involves 20 intelligence indicator(s), 6 complaint record(s), and 3 IPDR record(s). Analysis identified 1 unique IP address(es). The case has been assessed as HIGH risk. Cross-case infrastructure sharing was detected during analysis. 2 unique financial indicator(s) found; 0 reused across other case(s). Strongest similar case: CASE004 (100 similarity). The primary investigative hypothesis is 'Independent Complaints' with Moderate confidence.

Intelligence Assessment Summary

- The case contains 20 intelligence indicators.
- The case contains 6 linked complaint record(s).
- The case contains 3 IPDR record(s).
- 1 unique IP address(es) were observed during analysis.
- 2 unique financial indicator(s) found; 0 reused across other case(s).
- Strongest similar case is CASE004 with similarity score 100.
- 2 active intelligence alert(s) were generated for this case.
- Available intelligence indicators include: Phone, UPI, Email, Telegram, Phone, UPI, Email, Phone, Email, Phone, Email, Phone, Email, Phone, Email, Phone, UPI, Email, Telegram, Website.

2. Analytical Assessment

Relationship Graph (Spring Layout)

Relationship Graph (Concentric Layout)

3. Supporting Evidence & Confidence Details

IP Address: 103.88.44.20 (Confidence: Moderate)

Assessment: The cases share IP address 103.88.44.20. Confidence Level: Moderate. Meets criteria for Moderate confidence: has basic temporal logs and corroborating sources, with no unresolved high-severity contradictions. Uniqueness: Shared Suspect Node (Exclusive association: 0.6). Infrastructure Significance: Residential Endpoint / Dedicated Router (Likely home broadband or local dedicated endpoint. High attribution potential.). Temporal Proximity: Same Session (Direct temporal link showing continuous threat actor session.). Persistence: Single Event (Activity restricted to a single day (< 1 day).). Cross-Source Corroboration: Single Source (IP address appears in a single source only (uncorroborated IPDR log).).

8-Dimension Breakdown:

- Temporal: Same Session (Score: 1.0)
- Persistence: Single Event (Score: 0.1)
- Corroboration: Single Source (Score: 0.3)
- Recurrence: Isolated (Score: 0.0)
- Completeness: Complete Log Fields (Score: 1.0)
- Indicators: Multi-dimensional (Score: 1.0)
- Uniqueness: Shared Suspect Node (Score: 0.6)
- Infrastructure: Residential Endpoint / Dedicated Router (Score: 0.3)

4. Contradicting Evidence & Conflicts

No logical contradictions or chronology conflicts were detected in the case evidence.

5. Alternative Explanations Considered

Hypothesis Model: Independent Complaints (Score: 5, Strength: Medium)

Supporting: No indicator overlaps or shared network sessions are detected.

Contradicting: Single complaint file does not require grouping independent cases.

Gaps/Missing: None

Hypothesis Model: Single Fraud Actor (Score: 3, Strength: Low)

Supporting: No indicators connect this case to external investigations or other entities.

Contradicting: Multiple complaints (0) suggest a wider target scope than a single actor.

Gaps/Missing: None

Hypothesis Model: Shared Infrastructure (Score: 2, Strength: Low)

Supporting: No suspect identities are shared, pointing to independent actors sharing network nodes.

Contradicting: No IP address overlaps or network infrastructure reuse detected.

Gaps/Missing: None

Hypothesis Model: Fraud Ring (Score: 0, Strength: Low)

Supporting: None

Contradicting: Case contains only a single complaint, which contradicts the coordinated syndicate model.

Gaps/Missing: Missing evidence of shared suspect credentials/UPI accounts across complainants., No common IP address overlaps detected between different phone numbers.

Hypothesis Model: Repeat Offender (Score: 0, Strength: Low)

Supporting: None

Contradicting: No identity elements (phone numbers, UPI IDs, bank accounts) are shared with other cases.

Gaps/Missing: None

6. Reason Alternatives Were Ranked Lower

- **Single Fraud Actor:** Ranked lower because its score (3) is less than the primary candidate's score (5).
- **Shared Infrastructure:** Ranked lower because its score (2) is less than the primary candidate's score (5).
- **Fraud Ring:** Ranked lower because its score (0) is less than the primary candidate's score (5).
- **Repeat Offender:** Ranked lower because its score (0) is less than the primary candidate's score (5).

7. Final Investigative Assessment

Based on the logical confidence gates and sufficiency analysis, the case is officially categorized as:

Primary Threat Scenario: Independent Complaints

Confidence Level: Moderate

Investigative Summary: Multiple complaints recorded with zero indicator overlap, representing independent actors.

Case Correlation Findings (Historical Cross-Case Linkages)

- IP address 103.88.44.20 is also associated with case CASE004.
- IP address 103.88.44.20 is also associated with case CASE004.
- IP address 103.88.44.20 is also associated with case CASE004.

Investigator Action Recommendations

- Verify victim details and statement dates.
- Wait for additional digital evidence logs.
- Request beneficiary bank statements for each victim separately.
