

Cybercrime Intelligence Investigation Report

Case ID: CASE014

Primary Threat Scenario: Repeat Offender

Confidence Level: Moderate

Executive Summary

Case CASE014 involves 9 intelligence indicator(s), 1 complaint record(s), and 12 IPDR record(s). Analysis identified 4 unique IP address(es). The case has been assessed as HIGH risk. Cross-case infrastructure sharing was detected during analysis. 2 unique financial indicator(s) found; 2 reused across other case(s). Strongest similar case: CASE011 (100 similarity). The primary investigative hypothesis is 'Repeat Offender' with Moderate confidence.

Intelligence Assessment Summary

- The case contains 9 intelligence indicators.
- The case contains 1 linked complaint record(s).
- The case contains 12 IPDR record(s).
- 4 unique IP address(es) were observed during analysis.
- 2 unique financial indicator(s) found; 2 reused across other case(s).
- Strongest similar case is CASE011 with similarity score 100.
- 10 active intelligence alert(s) were generated for this case.
- Available intelligence indicators include: Phone, UPI, Email, Telegram, Website, Phone, UPI, Email, Telegram.

1. Evidence Summary

List of physical and digital indicators registered in the case with their record-level provenance and quality classifications.

Indicator Value	Type	Origin Module	Classification
9222222222	Phone	Entity Extraction Pipeline	Derived Evidence
suspect_beta@ybl	UPI	Entity Extraction Pipeline	Derived Evidence
sus_beta@protonmail.com	Email	Entity Extraction Pipeline	Derived Evidence

Relationship Graph (Concentric Layout)

3. Supporting Evidence & Confidence Details

IP Address: 49.37.120.10 (Confidence: Moderate)

Assessment: The cases share IP address 49.37.120.10. Confidence Level: Moderate. Meets criteria for Moderate confidence: has basic temporal logs and corroborating sources, with no unresolved high-severity contradictions. Uniqueness: Shared Suspect Node (Exclusive association: 0.6). Infrastructure Significance: Residential Endpoint / Dedicated Router (Likely home broadband or local dedicated endpoint. High attribution potential.). Temporal Proximity: Same Session (Direct temporal link showing continuous threat actor session.). Persistence: Single Event (Activity restricted to a single day (< 1 day).). Cross-Source Corroboration: Single Source (IP address appears in a single source only (uncorroborated IPDR log).). [Logical Contradictions] Detected 2 inconsistency/inconsistencies: Impossible travel detected for phone 9876543210: moved from 'Mumbai Central' to 'Jaipur Station' (~918 km) in 45 mins (Required speed: 1214 km/h). (The velocity exceeds physical transport limits, indicating account sharing, proxy hopping, or VPN masking.); Impossible travel detected for phone 9876543210: moved from 'Jaipur Station' to 'Mumbai Central' (~918 km) in 4 mins (Required speed: 14065 km/h). (The velocity exceeds physical transport limits, indicating account sharing, proxy hopping, or VPN masking.)

8-Dimension Breakdown:

4. Contradicting Evidence & Conflicts

The contradiction engine flagged the following logical inconsistencies:

- **[High Severity] impossible_travel:** Impossible travel detected for phone 9876543210: moved from 'Mumbai Central' to 'Jaipur Station' (~918 km) in 45 mins (Required speed: 1214 km/h).

Possible Explanation: The velocity exceeds physical transport limits, indicating account sharing, proxy hopping, or VPN masking.

- **[High Severity] impossible_travel:** Impossible travel detected for phone 9876543210: moved from 'Jaipur Station' to 'Mumbai Central' (~918 km) in 4 mins (Required speed: 14065 km/h).

Possible Explanation: The velocity exceeds physical transport limits, indicating account sharing, proxy hopping, or VPN masking.

5. Alternative Explanations Considered

Hypothesis Model: Repeat Offender (Score: 5, Strength: Medium)

Supporting: Identifiers (phone/UPI/accounts) match records in other cases or are reused internally.

Contradicting: None

Gaps/Missing: None

Hypothesis Model: Independent Complaints (Score: 5, Strength: Medium)

Supporting: No indicator overlaps or shared network sessions are detected.

Contradicting: Single complaint file does not require grouping independent cases.

Gaps/Missing: None

Hypothesis Model: Fraud Ring (Score: 4, Strength: Medium)

Supporting: Reused identity elements (Phone, UPI, or financial accounts) are observed across complaints.

Contradicting: Case contains only a single complaint, which contradicts the coordinated syndicate model., High-severity contradiction detected: Impossible travel detected for phone 9876543210: moved from 'Mumbai Central' to 'Jaipur Station' (~918 km) in 45 mins (Required speed: 1214 km/h)..

Gaps/Missing: No common IP address overlaps detected between different phone numbers.

Hypothesis Model: Single Fraud Actor (Score: 3, Strength: Low)

Supporting: No indicators connect this case to external investigations or other entities.

Contradicting: Multiple complaints (0) suggest a wider target scope than a single actor.

Gaps/Missing: None

Hypothesis Model: Shared Infrastructure (Score: 2, Strength: Low)

Supporting: No suspect identities are shared, pointing to independent actors sharing network nodes.

Contradicting: No IP address overlaps or network infrastructure reuse detected.

Gaps/Missing: None

6. Reason Alternatives Were Ranked Lower

- **Independent Complaints:** Ranked lower because its score (5) is less than the primary candidate's score (5).
- **Fraud Ring:** Ranked lower because its score (4) is less than the primary candidate's score (5).
- **Single Fraud Actor:** Ranked lower because its score (3) is less than the primary candidate's score (5).
- **Shared Infrastructure:** Ranked lower because its score (2) is less than the primary candidate's score (5).

7. Final Investigative Assessment

Based on the logical confidence gates and sufficiency analysis, the case is officially categorized as:

Primary Threat Scenario: Repeat Offender

Confidence Level: Moderate

Investigative Summary: Indications suggest threat activity associated with a Repeat Offender.

Investigator Action Recommendations

- Retrieve historic investigator annotations for matching IDs.
- Request suspect KYC and account logs from the bank.
- Log custody and issue notice for the suspect phone line.
