

Cybercrime Intelligence Investigation Report

Case ID: CASE205

Primary Threat Scenario: Independent Complaints

Confidence Level: Moderate

Executive Summary

Case CASE205 involves 1 intelligence indicator(s), 2 complaint record(s), and 2 IPDR record(s). Analysis identified 1 unique IP address(es). The case has been assessed as LOW risk. 1 unique financial indicator(s) found; 0 reused across other case(s). The primary investigative hypothesis is 'Independent Complaints' with Moderate confidence.

Intelligence Assessment Summary

- The case contains 1 intelligence indicators.
- The case contains 2 linked complaint record(s).
- The case contains 2 IPDR record(s).
- 1 unique IP address(es) were observed during analysis.
- 1 unique financial indicator(s) found; 0 reused across other case(s).
- 1 active intelligence alert(s) were generated for this case.
- Available intelligence indicators include: UPI.

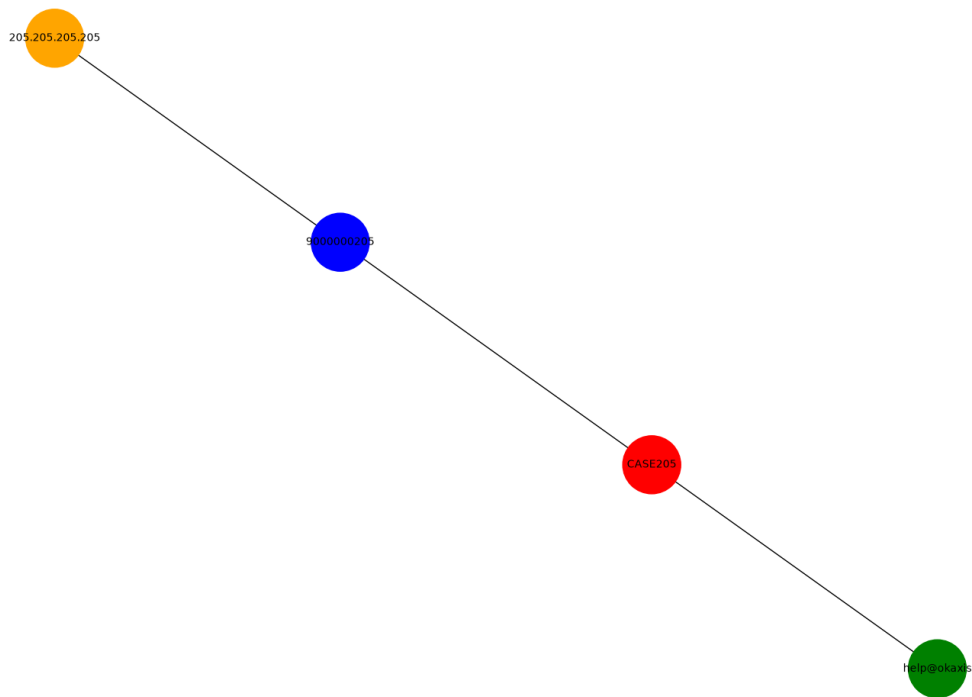

1. Evidence Summary

List of physical and digital indicators registered in the case with their record-level provenance and quality classifications.

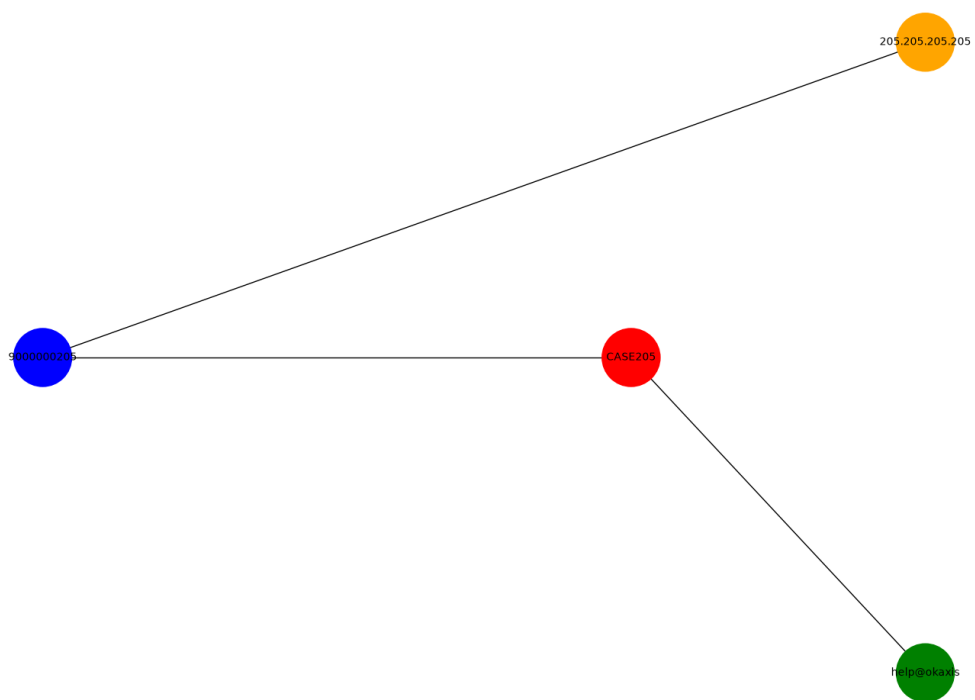

Indicator Value	Type	Origin Module	Classification
help@okaxis	UPI	Entity Extraction Pipeline	Derived Evidence
9000000205	Complainant Phone	National Cyber Crime Portal Ingest	Direct Evidence
help@okaxis	Complainant UPI	National Cyber Crime Portal Ingest	Direct Evidence
9000000205	Complainant Phone	National Cyber Crime Portal Ingest	Direct Evidence
help@okaxis	Complainant UPI	National Cyber Crime Portal Ingest	Direct Evidence

2. Analytical Assessment

Relationship Graph (Spring Layout)

Relationship Graph (Concentric Layout)

3. Supporting Evidence & Confidence Details

IP Address: 205.205.205.205 (Confidence: Limited)

Assessment: The cases share IP address 205.205.205.205. Confidence Level: Limited. Confidence level is restricted to Limited due to 2 unresolved high-severity contradiction(s) affecting this IP address. Uniqueness: Exclusive (Exclusive association: 1.0). Infrastructure Significance: Potential Syndicate Hub (IP matches known proxy/hosting or central operational nodes (High significance).). Temporal Proximity: Historical Activity / No overlap (No temporal overlap between different phone numbers.). Persistence: Single Event (Activity restricted to a single day (< 1 day).). Cross-Source Corroboration: Single Source (IP address appears in a single source only (uncorroborated IPDR log).). [Logical Contradictions] Detected 2 inconsistency/inconsistencies: Phone 9000000205 logged simultaneously (at 2026-07-02 15:20:00) from two different locations: 'Delhi CP' and 'Mumbai Central'. (Multiple devices are active on the same line, or spoofed tower credentials are being utilized by the suspect.); Phone 9000000205 logged from coordinates in 'Delhi CP' and 'Mumbai Central' (~1163 km apart) at the exact same time. (Account credentials or SIM sharing is active across distinct geographic locations.)

8-Dimension Breakdown:

- Temporal: Historical Activity / No overlap (Score: 0.0)
- Persistence: Single Event (Score: 0.1)
- Corroboration: Single Source (Score: 0.3)
- Recurrence: Isolated (Score: 0.0)
- Completeness: Complete Log Fields (Score: 1.0)
- Indicators: Mono-dimensional (Score: 0.3)
- Uniqueness: Exclusive (Score: 1.0)
- Infrastructure: Potential Syndicate Hub (Score: 1.0)

4. Contradicting Evidence & Conflicts

The contradiction engine flagged the following logical inconsistencies:

- **[High Severity] duplicate_impossible_timestamps:** Phone 9000000205 logged simultaneously (at 2026-07-02 15:20:00) from two different locations: 'Delhi CP' and 'Mumbai Central'.

Possible Explanation: Multiple devices are active on the same line, or spoofed tower credentials are being utilized by the suspect.

- **[High Severity] impossible_travel:** Phone 9000000205 logged from coordinates in 'Delhi CP' and 'Mumbai Central' (~1163 km apart) at the exact same time.

Possible Explanation: Account credentials or SIM sharing is active across distinct geographic locations.

5. Alternative Explanations Considered

Hypothesis Model: Independent Complaints (Score: 5, Strength: Medium)

Supporting: No indicator overlaps or shared network sessions are detected.

Contradicting: Single complaint file does not require grouping independent cases.

Gaps/Missing: None

Hypothesis Model: Single Fraud Actor (Score: 3, Strength: Low)

Supporting: No indicators connect this case to external investigations or other entities.

Contradicting: Multiple complaints (0) suggest a wider target scope than a single actor.

Gaps/Missing: None

Hypothesis Model: Shared Infrastructure (Score: 2, Strength: Low)

Supporting: No suspect identities are shared, pointing to independent actors sharing network nodes.

Contradicting: No IP address overlaps or network infrastructure reuse detected.

Gaps/Missing: None

Hypothesis Model: Fraud Ring (Score: 0, Strength: Low)

Supporting: None

Contradicting: Case contains only a single complaint, which contradicts the coordinated syndicate model., High-severity contradiction detected: Phone 9000000205 logged simultaneously (at 2026-07-02 15:20:00) from two different locations: 'Delhi CP' and 'Mumbai Central'..

Gaps/Missing: Missing evidence of shared suspect credentials/UPI accounts across complainants., No common IP address overlaps detected between different phone numbers.

Hypothesis Model: Repeat Offender (Score: 0, Strength: Low)

Supporting: None

Contradicting: No identity elements (phone numbers, UPI IDs, bank accounts) are shared with other cases.

Gaps/Missing: None

6. Reason Alternatives Were Ranked Lower

- **Single Fraud Actor:** Ranked lower because its score (3) is less than the primary candidate's score (5).
- **Shared Infrastructure:** Ranked lower because its score (2) is less than the primary candidate's score (5).
- **Fraud Ring:** Ranked lower because its score (0) is less than the primary candidate's score (5).
- **Repeat Offender:** Ranked lower because its score (0) is less than the primary candidate's score (5).

7. Final Investigative Assessment

Based on the logical confidence gates and sufficiency analysis, the case is officially categorized as:

Primary Threat Scenario: Independent Complaints

Confidence Level: Moderate

Investigative Summary: Multiple complaints recorded with zero indicator overlap, representing independent actors.

Case Correlation Findings (Historical Cross-Case Linkages)

- No cross-case infrastructure sharing was identified.

Investigator Action Recommendations

- Verify victim details and statement dates.
- Wait for additional digital evidence logs.
- Request beneficiary bank statements for each victim separately.
