

Cybercrime Intelligence Investigation Report

Case ID: CASE207

Primary Threat Scenario: Independent Complaints

Confidence Level: Moderate

Executive Summary

Case CASE207 involves 1 intelligence indicator(s), 1 complaint record(s), and 2 IPDR record(s). Analysis identified 1 unique IP address(es). The case has been assessed as LOW risk. The primary investigative hypothesis is 'Independent Complaints' with Moderate confidence.

Intelligence Assessment Summary

- The case contains 1 intelligence indicators.
- The case contains 1 linked complaint record(s).
- The case contains 2 IPDR record(s).
- 1 unique IP address(es) were observed during analysis.
- No UPI, bank account, wallet, IFSC or transaction indicators are currently recorded.
- 1 active intelligence alert(s) were generated for this case.
- Available intelligence indicators include: Phone.

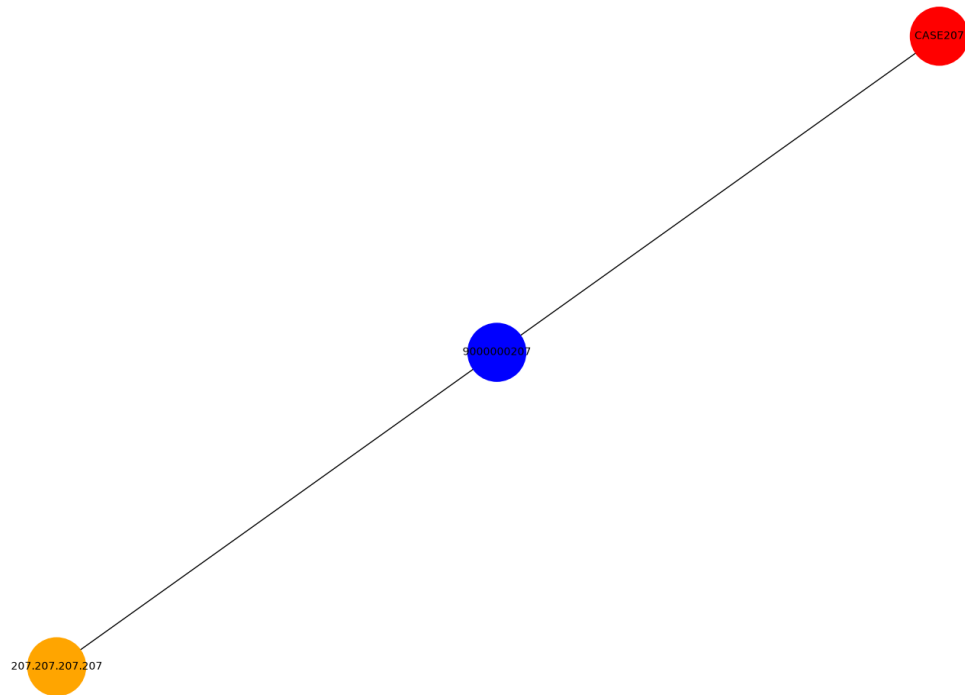

1. Evidence Summary

List of physical and digital indicators registered in the case with their record-level provenance and quality classifications.

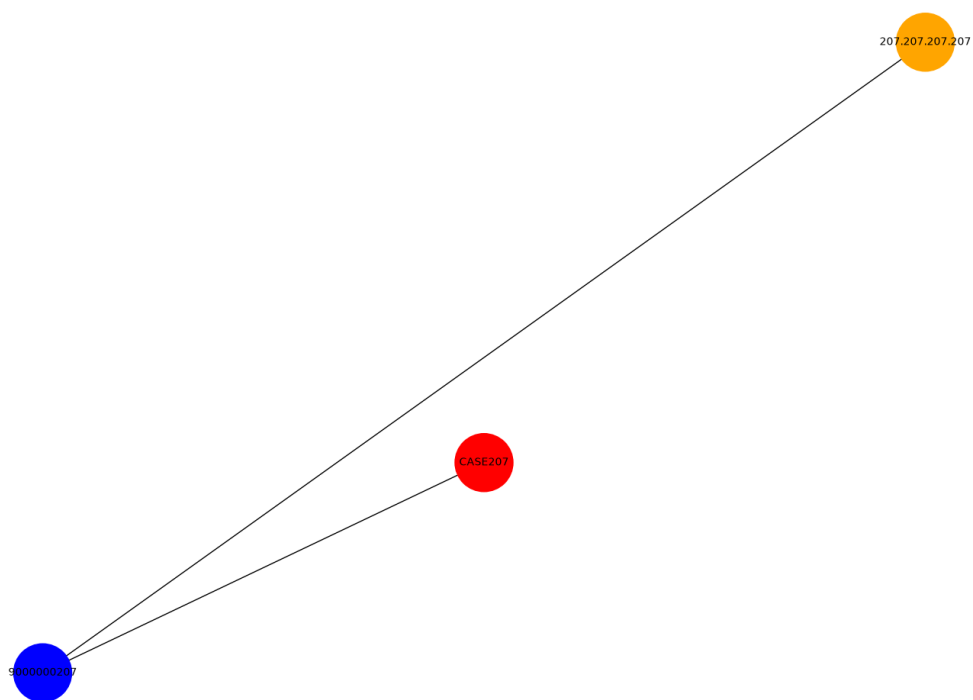

Indicator Value	Type	Origin Module	Classification
9000000207	Phone	Entity Extraction Pipeline	Derived Evidence
9000000207	Complainant Phone	National Cyber Crime Portal Ingest	Direct Evidence

2. Analytical Assessment

Relationship Graph (Concentric Layout)

3. Supporting Evidence & Confidence Details

IP Address: 207.207.207.207 (Confidence: Moderate)

Assessment: The cases share IP address 207.207.207.207. Confidence Level: Moderate. Meets criteria for Moderate confidence: has basic temporal logs and corroborating sources, with no unresolved high-severity contradictions. Uniqueness: Exclusive (Exclusive association: 1.0). Infrastructure Significance: Potential Syndicate Hub (IP matches known proxy/hosting or central operational nodes (High significance).). Temporal Proximity: Historical Activity / No overlap (No temporal overlap between different phone numbers.). Persistence: Single Event (Activity restricted to a single day (< 1 day).). Cross-Source Corroboration: Single Source (IP address appears in a single source only (uncorroborated IPDR log).). [Logical Contradictions] Detected 2 inconsistency/inconsistencies: IPDR record 110 has location text 'Mumbai Central' but coordinates are in Delhi CP (lat 28.6304, lon 77.2177). (Geocoded coordinates conflict with the text-based location label in the telecom records.); IPDR record 111 has location text 'Mumbai Central' but coordinates are in Delhi CP (lat 28.6304, lon 77.2177). (Geocoded coordinates conflict with the text-based location label in the telecom records.)

8-Dimension Breakdown:

- Temporal: Historical Activity / No overlap (Score: 0.0)
- Persistence: Single Event (Score: 0.1)
- Corroboration: Single Source (Score: 0.3)
- Recurrence: Isolated (Score: 0.0)
- Completeness: Complete Log Fields (Score: 1.0)
- Indicators: Mono-dimensional (Score: 0.3)
- Uniqueness: Exclusive (Score: 1.0)
- Infrastructure: Potential Syndicate Hub (Score: 1.0)

4. Contradicting Evidence & Conflicts

The contradiction engine flagged the following logical inconsistencies:

- **[Medium Severity] conflicting_geospatial_evidence:** IPDR record 110 has location text 'Mumbai Central' but coordinates are in Delhi CP (lat 28.6304, lon 77.2177).

Possible Explanation: Geocoded coordinates conflict with the text-based location label in the telecom records.

- **[Medium Severity] conflicting_geospatial_evidence:** IPDR record 111 has location text 'Mumbai Central' but coordinates are in Delhi CP (lat 28.6304, lon 77.2177).

Possible Explanation: Geocoded coordinates conflict with the text-based location label in the telecom records.

5. Alternative Explanations Considered

Hypothesis Model: Independent Complaints (Score: 5, Strength: Medium)

Supporting: No indicator overlaps or shared network sessions are detected.

Contradicting: Single complaint file does not require grouping independent cases.

Gaps/Missing: None

Hypothesis Model: Single Fraud Actor (Score: 3, Strength: Low)

Supporting: No indicators connect this case to external investigations or other entities.

Contradicting: Multiple complaints (0) suggest a wider target scope than a single actor.

Gaps/Missing: None

Hypothesis Model: Shared Infrastructure (Score: 2, Strength: Low)

Supporting: No suspect identities are shared, pointing to independent actors sharing network nodes.

Contradicting: No IP address overlaps or network infrastructure reuse detected.

Gaps/Missing: None

Hypothesis Model: Fraud Ring (Score: 0, Strength: Low)

Supporting: None

Contradicting: Case contains only a single complaint, which contradicts the coordinated syndicate model.

Gaps/Missing: Missing evidence of shared suspect credentials/UPI accounts across complainants., No common IP address overlaps detected between different phone numbers.

Hypothesis Model: Repeat Offender (Score: 0, Strength: Low)

Supporting: None

Contradicting: No identity elements (phone numbers, UPI IDs, bank accounts) are shared with other cases.

Gaps/Missing: None

6. Reason Alternatives Were Ranked Lower

- **Single Fraud Actor:** Ranked lower because its score (3) is less than the primary candidate's score (5).
- **Shared Infrastructure:** Ranked lower because its score (2) is less than the primary candidate's score (5).
- **Fraud Ring:** Ranked lower because its score (0) is less than the primary candidate's score (5).
- **Repeat Offender:** Ranked lower because its score (0) is less than the primary candidate's score (5).

7. Final Investigative Assessment

Based on the logical confidence gates and sufficiency analysis, the case is officially categorized as:

Primary Threat Scenario: Independent Complaints

Confidence Level: Moderate

Investigative Summary: Multiple complaints recorded with zero indicator overlap, representing independent actors.

Case Correlation Findings (Historical Cross-Case Linkages)

- No cross-case infrastructure sharing was identified.

Investigator Action Recommendations

- Verify victim details and statement dates.
- Wait for additional digital evidence logs.
- Request beneficiary bank statements for each victim separately.
