

Cybercrime Intelligence Investigation Report

Case ID: CASE208

Primary Threat Scenario: Independent Complaints

Confidence Level: Moderate

Executive Summary

Case CASE208 involves 1 intelligence indicator(s), 2 complaint record(s), and 2 IPDR record(s). Analysis identified 1 unique IP address(es). The case has been assessed as LOW risk. The primary investigative hypothesis is 'Independent Complaints' with Moderate confidence.

Intelligence Assessment Summary

- The case contains 1 intelligence indicators.
- The case contains 2 linked complaint record(s).
- The case contains 2 IPDR record(s).
- 1 unique IP address(es) were observed during analysis.
- No UPI, bank account, wallet, IFSC or transaction indicators are currently recorded.
- Available intelligence indicators include: IP Address.

1. Evidence Summary

List of physical and digital indicators registered in the case with their record-level provenance and quality classifications.

Indicator Value	Type	Origin Module	Classification
208.208.208.208	IP Address	Entity Extraction Pipeline	Derived Evidence
9000000208	Complainant Phone	National Cyber Crime Portal Ingest	Direct Evidence
9000000208	Complainant Phone	National Cyber Crime Portal Ingest	Direct Evidence

2. Analytical Assessment

Relationship Graph (Concentric Layout)

3. Supporting Evidence & Confidence Details

IP Address: 208.208.208.208 (Confidence: Strong)

Assessment: The cases share IP address 208.208.208.208. Confidence Level: Strong. Meets mandatory criteria for Strong confidence: sufficient corroboration (Dual-source or higher), close temporal proximity, and complete data records with no unresolved high-severity contradictions. Uniqueness: Shared Suspect Node (Exclusive association: 0.6). Infrastructure Significance: Residential Endpoint / Dedicated Router (Likely home broadband or local dedicated endpoint. High attribution potential.). Temporal Proximity: Same Session (Direct temporal link showing continuous threat actor session.). Persistence: Single Event (Activity restricted to a single day (< 1 day).). Cross-Source Corroboration: Multi-Source Triangulation (IP address corroborated across 3+ independent sources (IPDR + Entity + Evidence Log).).

8-Dimension Breakdown:

- Temporal: Same Session (Score: 1.0)
- Persistence: Single Event (Score: 0.1)
- Corroboration: Multi-Source Triangulation (Score: 1.0)
- Recurrence: Isolated (Score: 0.0)
- Completeness: Complete Log Fields (Score: 1.0)
- Indicators: Mono-dimensional (Score: 0.3)
- Uniqueness: Shared Suspect Node (Score: 0.6)
- Infrastructure: Residential Endpoint / Dedicated Router (Score: 0.3)

4. Contradicting Evidence & Conflicts

No logical contradictions or chronology conflicts were detected in the case evidence.

5. Alternative Explanations Considered

Hypothesis Model: Independent Complaints (Score: 5, Strength: Medium)

Supporting: No indicator overlaps or shared network sessions are detected.

Contradicting: Single complaint file does not require grouping independent cases.

Gaps/Missing: None

Hypothesis Model: Single Fraud Actor (Score: 3, Strength: Low)

Supporting: No indicators connect this case to external investigations or other entities.

Contradicting: Multiple complaints (0) suggest a wider target scope than a single actor.

Gaps/Missing: None

Hypothesis Model: Shared Infrastructure (Score: 2, Strength: Low)

Supporting: No suspect identities are shared, pointing to independent actors sharing network nodes.

Contradicting: No IP address overlaps or network infrastructure reuse detected.

Gaps/Missing: None

Hypothesis Model: Fraud Ring (Score: 0, Strength: Low)

Supporting: None

Contradicting: Case contains only a single complaint, which contradicts the coordinated syndicate model.

Gaps/Missing: Missing evidence of shared suspect credentials/UPI accounts across complainants., No common IP address overlaps detected between different phone numbers.

Hypothesis Model: Repeat Offender (Score: 0, Strength: Low)

Supporting: None

Contradicting: No identity elements (phone numbers, UPI IDs, bank accounts) are shared with other cases.

Gaps/Missing: None

6. Reason Alternatives Were Ranked Lower

- **Single Fraud Actor:** Ranked lower because its score (3) is less than the primary candidate's score (5).
- **Shared Infrastructure:** Ranked lower because its score (2) is less than the primary candidate's score (5).
- **Fraud Ring:** Ranked lower because its score (0) is less than the primary candidate's score (5).
- **Repeat Offender:** Ranked lower because its score (0) is less than the primary candidate's score (5).

7. Final Investigative Assessment

Based on the logical confidence gates and sufficiency analysis, the case is officially categorized as:

Primary Threat Scenario: Independent Complaints

Confidence Level: Moderate

Investigative Summary: Multiple complaints recorded with zero indicator overlap, representing independent actors.

Case Correlation Findings (Historical Cross-Case Linkages)

- No cross-case infrastructure sharing was identified.

Investigator Action Recommendations

- Verify victim details and statement dates.
- Wait for additional digital evidence logs.
- Request beneficiary bank statements for each victim separately.
