

Cybercrime Intelligence Investigation Report

Case ID: CASE216

Primary Threat Scenario: Repeat Offender

Confidence Level: Moderate

Executive Summary

Case CASE216 involves 3 intelligence indicator(s), 1 complaint record(s), and 1 IPDR record(s). Analysis identified 1 unique IP address(es). The case has been assessed as HIGH risk. Cross-case infrastructure sharing was detected during analysis. 1 unique financial indicator(s) found; 1 reused across other case(s). Strongest similar case: CASE215 (100 similarity). The primary investigative hypothesis is 'Repeat Offender' with Moderate confidence.

Intelligence Assessment Summary

- The case contains 3 intelligence indicators.
- The case contains 1 linked complaint record(s).
- The case contains 1 IPDR record(s).
- 1 unique IP address(es) were observed during analysis.
- 1 unique financial indicator(s) found; 1 reused across other case(s).
- Strongest similar case is CASE215 with similarity score 100.
- 5 active intelligence alert(s) were generated for this case.
- Available intelligence indicators include: UPI, Phone, Email.

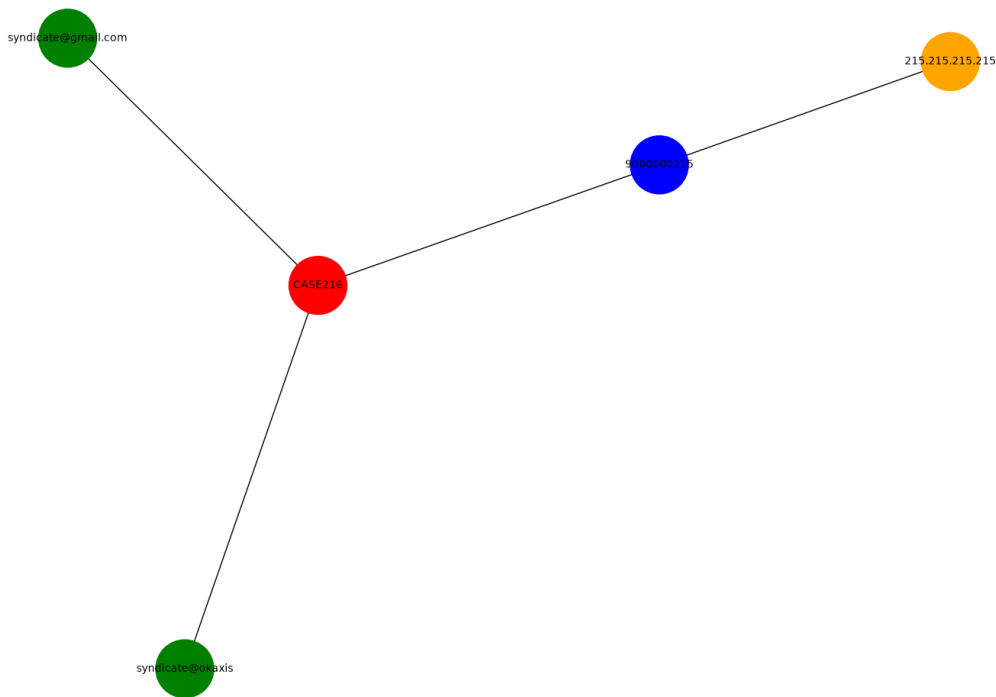

1. Evidence Summary

List of physical and digital indicators registered in the case with their record-level provenance and quality classifications.

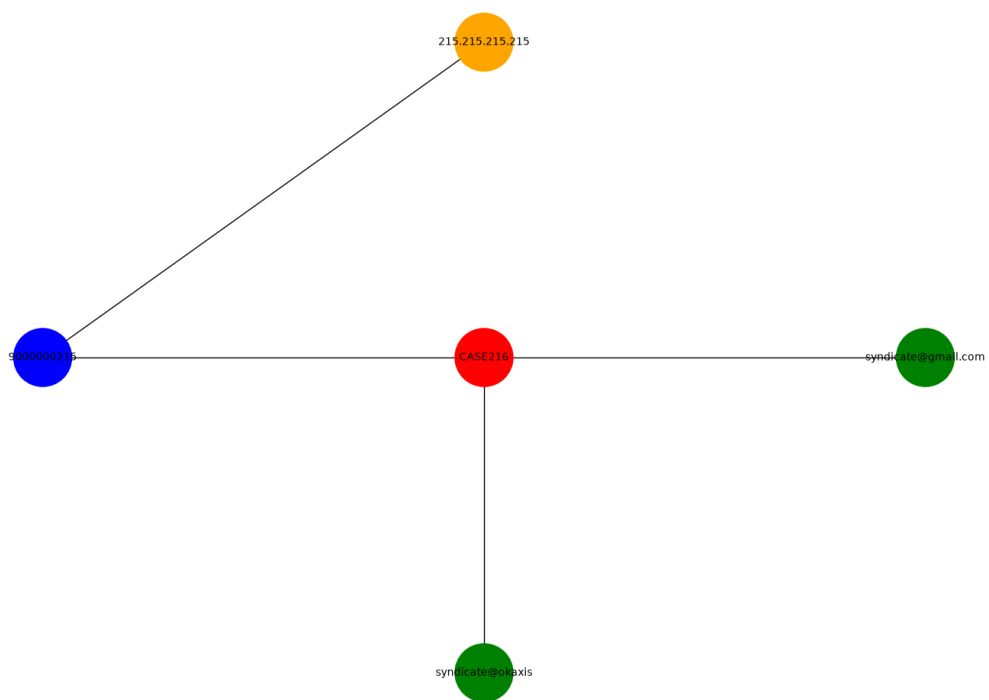

Indicator Value	Type	Origin Module	Classification
syndicate@okaxis	UPI	Entity Extraction Pipeline	Derived Evidence
9000000215	Phone	Entity Extraction Pipeline	Derived Evidence
syndicate@gmail.com	Email	Entity Extraction Pipeline	Derived Evidence
9000000215	Complainant Phone	National Cyber Crime Portal Ingest	Direct Evidence
syndicate@okaxis	Complainant UPI	National Cyber Crime Portal Ingest	Direct Evidence

2. Analytical Assessment

Relationship Graph (Spring Layout)

Relationship Graph (Concentric Layout)

3. Supporting Evidence & Confidence Details

IP Address: 215.215.215.215 (Confidence: Insufficient Evidence)

Assessment: The cases share IP address 215.215.215.215. Confidence Level: Insufficient Evidence. The IP address has fewer than 2 total digital logs in this case, which is insufficient for any attribution analysis. Uniqueness: Exclusive (Exclusive association: 1.0). Infrastructure Significance: Residential Endpoint / Dedicated Router (Likely home broadband or local dedicated endpoint. High attribution potential.). Temporal Proximity: Historical Activity / No overlap (No temporal overlap between different phone numbers.). Persistence: Single Event (Activity restricted to a single day (< 1 day).). Cross-Source Corroboration: Single Source (IP address appears in a single source only (uncorroborated IPDR log).).

8-Dimension Breakdown:

- Temporal: Historical Activity / No overlap (Score: 0.0)
- Persistence: Single Event (Score: 0.1)
- Corroboration: Single Source (Score: 0.3)
- Recurrence: Isolated (Score: 0.0)
- Completeness: Complete Log Fields (Score: 1.0)
- Indicators: Multi-dimensional (Score: 1.0)
- Uniqueness: Exclusive (Score: 1.0)
- Infrastructure: Residential Endpoint / Dedicated Router (Score: 0.3)

4. Contradicting Evidence & Conflicts

No logical contradictions or chronology conflicts were detected in the case evidence.

5. Alternative Explanations Considered

Hypothesis Model: Repeat Offender (Score: 5, Strength: Medium)

Supporting: Identifiers (phone/UPI/accounts) match records in other cases or are reused internally.

Contradicting: None

Gaps/Missing: None

Hypothesis Model: Independent Complaints (Score: 5, Strength: Medium)

Supporting: No indicator overlaps or shared network sessions are detected.

Contradicting: Single complaint file does not require grouping independent cases.

Gaps/Missing: None

Hypothesis Model: Fraud Ring (Score: 4, Strength: Medium)

Supporting: Reused identity elements (Phone, UPI, or financial accounts) are observed across complaints.

Contradicting: Case contains only a single complaint, which contradicts the coordinated syndicate model.

Gaps/Missing: No common IP address overlaps detected between different phone numbers.

Hypothesis Model: Single Fraud Actor (Score: 3, Strength: Low)

Supporting: No indicators connect this case to external investigations or other entities.

Contradicting: Multiple complaints (0) suggest a wider target scope than a single actor.

Gaps/Missing: None

Hypothesis Model: Shared Infrastructure (Score: 2, Strength: Low)

Supporting: No suspect identities are shared, pointing to independent actors sharing network nodes.

Contradicting: No IP address overlaps or network infrastructure reuse detected.

Gaps/Missing: None

6. Reason Alternatives Were Ranked Lower

- **Independent Complaints:** Ranked lower because its score (5) is less than the primary candidate's score (5).
- **Fraud Ring:** Ranked lower because its score (4) is less than the primary candidate's score (5).
- **Single Fraud Actor:** Ranked lower because its score (3) is less than the primary candidate's score (5).
- **Shared Infrastructure:** Ranked lower because its score (2) is less than the primary candidate's score (5).

7. Final Investigative Assessment

Based on the logical confidence gates and sufficiency analysis, the case is officially categorized as:

Primary Threat Scenario: Repeat Offender

Confidence Level: Moderate

Investigative Summary: Indications suggest threat activity associated with a Repeat Offender.

Case Correlation Findings (Historical Cross-Case Linkages)

- IP address 215.215.215.215 is also associated with case CASE215.
- IP address 215.215.215.215 is also associated with case CASE217.
- IP address 215.215.215.215 is also associated with case CASE218.

Investigator Action Recommendations

- Retrieve historic investigator annotations for matching IDs.
- Request suspect KYC and account logs from the bank.
- Log custody and issue notice for the suspect phone line.
